SUMMARY

Computer Science graduate from UW-Madison with full-stack experience across React, Python, and Java. I have built technical proficiency through professional experience, coursework, and personal projects, and am always looking to learn new technologies. Looking for full-time software engineering roles in full-stack or AI-adjacent environments.

EDUCATION

University of Wisconsin-Madison

Sep. 2022 - May 2026

BS, Computer Science with a Data Science Certificate

Madison, WI

- Relevant Coursework: Algorithms, Operating Systems, Software Engineering, Databases, Mathematics in Machine Learning, Information Security, UI/UX Design, Data Science, Linear Optimization, Linear Algebra, Engineering Statistics

LEADERSHIP AND WORK EXPERIENCE

Amazon/Shopbop

Jan. 2026 – April 2026

Software Developer (UW Madison Capstone)

Madison, WI

- Served as Product Owner for a 5-person capstone team, owning the full Jira backlog and sprint planning while conducting customer interviews and iterating on a capsule wardrobe creation app under Shopbop mentorship.

TVScientific

Jun. 2025 – Sept. 2025

Software Development Intern

El Segundo, CA

- Designed and implemented new audience targeting functions as a part of an agile development team
- Built a custom GitHub Action to automate backporting, improving the development experience by streamlining a difficult part of the CI/CD process.
- Improved frontend test coverage using Jest, ensuring reliability of UI components.

Humorology Inc.

Jun. 2023 – April 2026

Executive Director

Madison, WI

- Served as the primary liaison between the executive board and 9 casts of 100-200 members, facilitating director meetings and driving key organizational decisions across all productions.
- Raised \$850,000 for the Gio's Garden nonprofit respite care service during the 2025-2026 academic year.

Public Relations Chair

- Handled all marketing and community relations for Wisconsin's largest student-run philanthropy, including social media, apparel design, show program, videographer/photographer booking, and website maintenance.
- Raised over \$610,000 for the Safe Harbor Child Advocacy Center, a \$100,000 increase from the previous year.

SKILLS

- Languages: Java, Python, JavaScript/TypeScript, C, C++, R, Assembly
- Frameworks & Tools: React, Next.js, Spring Boot, FastAPI, Jest, Vite, Tailwind CSS, Docker, Git, GitHub Actions, Jira, SQLAlchemy
- Databases: PostgreSQL, MySQL, SQLite, Supabase

PROJECTS

QuestGPT Text-Based Game

May 2025

- Full-stack survival game integrating the Gemma 3 LLM for dynamic NPC dialogue and quest generation, built with Java, Spring Boot, React, and MySQL on a 5-person team for CS 506 (Software Development).

MadMovies Movie Recommendation Service

February 2025

- Full-stack movie recommendation app built in 24 hours for MadData Hackathon, using FastAPI, SQLite, and React. Users complete a preference quiz filtered against a movie dataset, with live poster fetching via the TMDB API.
